

Pranav M

Software Engineer — Frontend Developer | AI/ML Practitioner

pranav.m.cst.2024@snsce.ac.in | +91 96009 46253 | Coimbatore, Tamil Nadu | [linkedin.com/in/pranav-m](https://www.linkedin.com/in/pranav-m) | github.com/pranav-m2006

Summary

Front-end developer with hands-on experience in AI/ML projects, including a Disaster Management System, and active participation in national-level hackathons such as SIH 2025.

Experience

Web Development Intern — CodSoft

- Developed and enhanced responsive web interfaces, applying core HTML, CSS, and JavaScript concepts to real project tasks.
- Collaborated on debugging and refining front-end components to improve usability and code quality.

Web Development Intern — InternPe

- Built front-end features for web projects, strengthening practical experience with JavaScript and version control using Git.

Education

SNS College of Engineering

B.E. in Computer Science and Technology | Sept 2024 – 2028 | CGPA: 8.00 / 10

Presentation Convent Matriculation Hr. Sec. School

Higher Secondary (HSC) – 73% | SSLC – 81.6%

Skills

- Java | JavaScript | C | C++
- HTML | CSS | React.js | Node.js | FlutterFlow
- **AI/ML fundamentals**, applied through hackathons and independent projects
- Git | GitHub
- Communication | Problem-Solving | Teamwork | Time Management | Adaptability

Projects

Disaster Management System — AI/ML Project

- Built an AI/ML-powered system that predicts weather conditions and generates precautionary guidance to help reduce disaster impact.
- Applied machine learning models for weather prediction and translated outputs into actionable safety recommendations.

Learning Zone — Certification Learning Platform

- Designed an online platform that helps learners study and earn certifications, featuring an AI-driven module that assists in teaching students.

Finance Tracker — Expense Management App

- Built an application that tracks and manages monthly expenses, using AI-based analysis to give users clear insights into their spending patterns.

Achievements & Learning Highlights

- **Smart India Hackathon (SIH) 2025** — Participated at the national level, gaining hands-on exposure to real-world problem solving.
- Hackathons: GPTathon, CodeSprint
- **Product Patents: 2 Certified Product Patents**
- Paper Presentation — presented technical research at a college-level event.
- **LeetCode: Solved 150+ problems, maintaining a 100-day consistency streak**
- **Consistently building AI/ML knowledge** to complement front-end development skills, applied directly in the Disaster Management System project.

Certifications

- Great Learning — [View Certificate](#)
- NASSCOM — [View Certificate](#)
- IBM — [View Certificate](#)
- Oracle — [View Certificate](#)
- NLP Workshop — [View Certificate](#)
- C / C++ / Python in CSE — [View Certificate](#)
- Paper Presentation — [View Certificate](#)

Additional Information

Languages: English, German (Beginner) | Continuously strengthening skills in Git, GitHub, React.js, Node.js, and advanced AI/ML concepts.
